

I didn't start with a perfect plan. I started with a business, learned what it needed, and kept building from there.

VIVEK BORKAR

FOUNDER

From e-commerce to website builder

Year 1

E-COMMERCE

Started first business and learned essential marketing.

Year 2

SERVICES

Built an 8-person digital marketing team.

Recent

AI AUTOMATION

Shifted to building AI tools and workflows.

Training

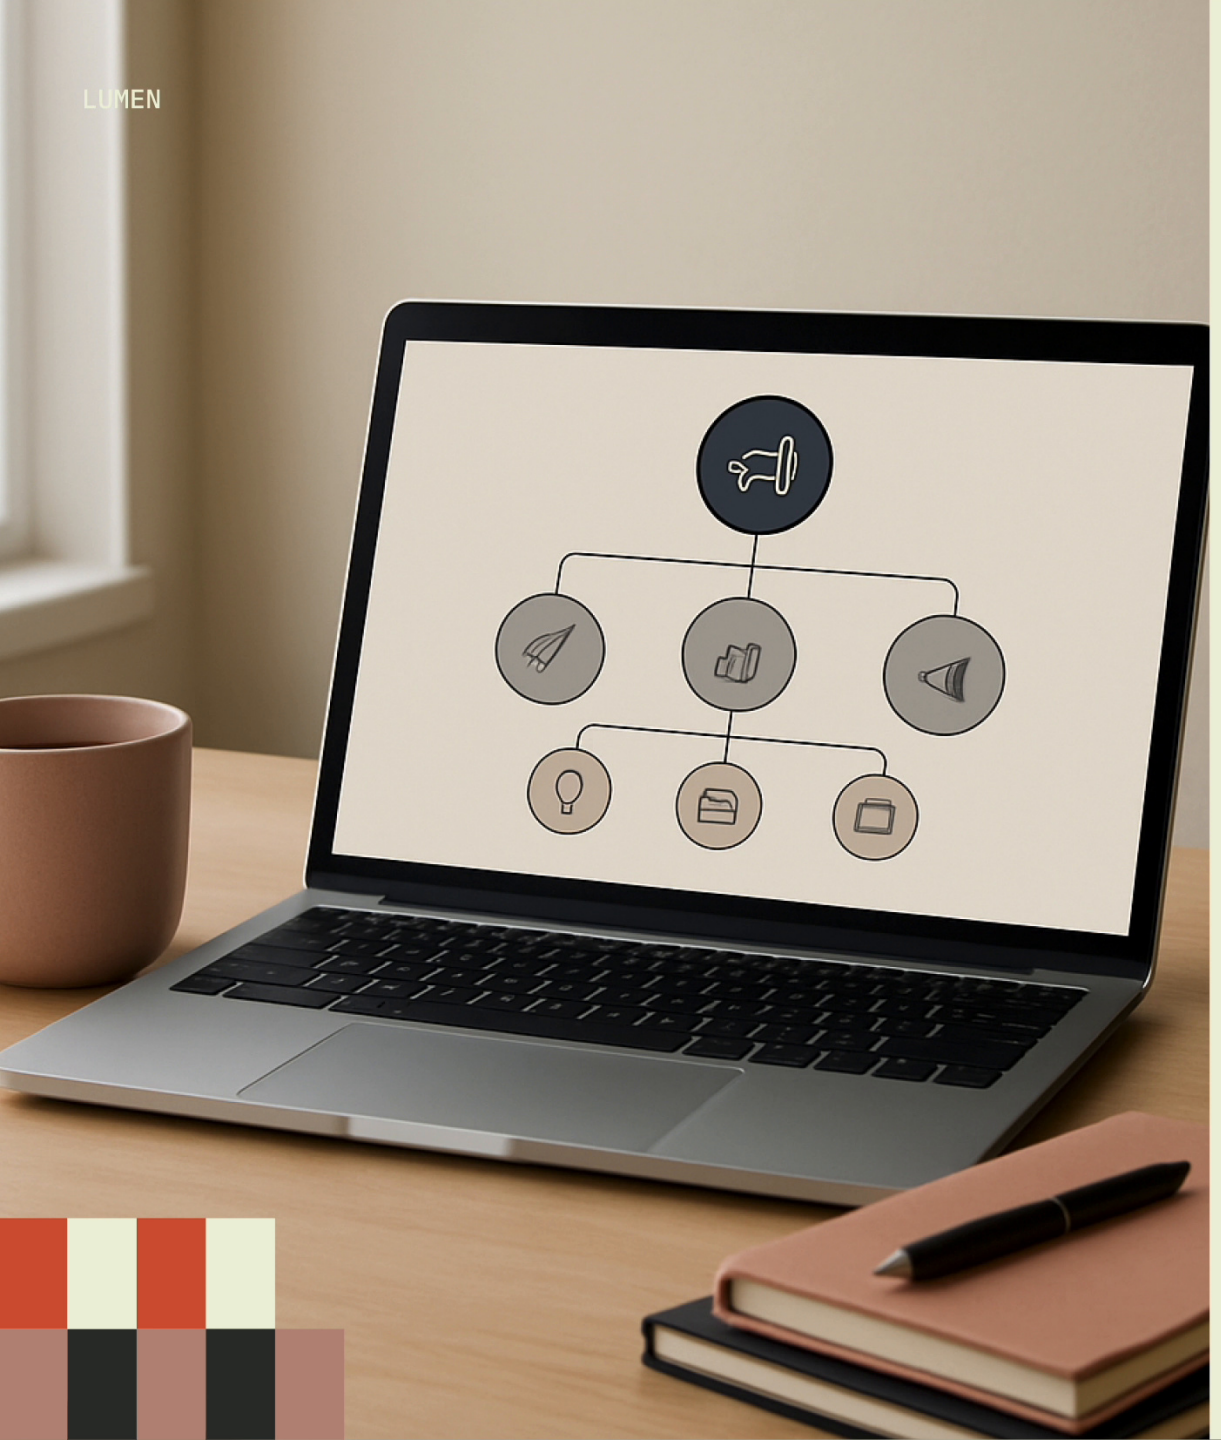

ASM & KITS

Completed digital marketing training programs.

Today

LUMEN

Developing website builder for non-technical users.

Learning by doing

E-commerce taught me that a product alone is not enough; customer acquisition and marketing matter. That experience led me to provide digital marketing services and build a team of eight people.

MARKETING TO GROWTH

Key growth and team milestones

₹10L+

REVENUE

Crossed over ten lakh in revenue through digital marketing work.

8

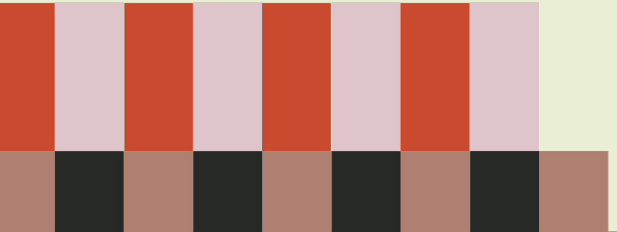

TEAM SIZE

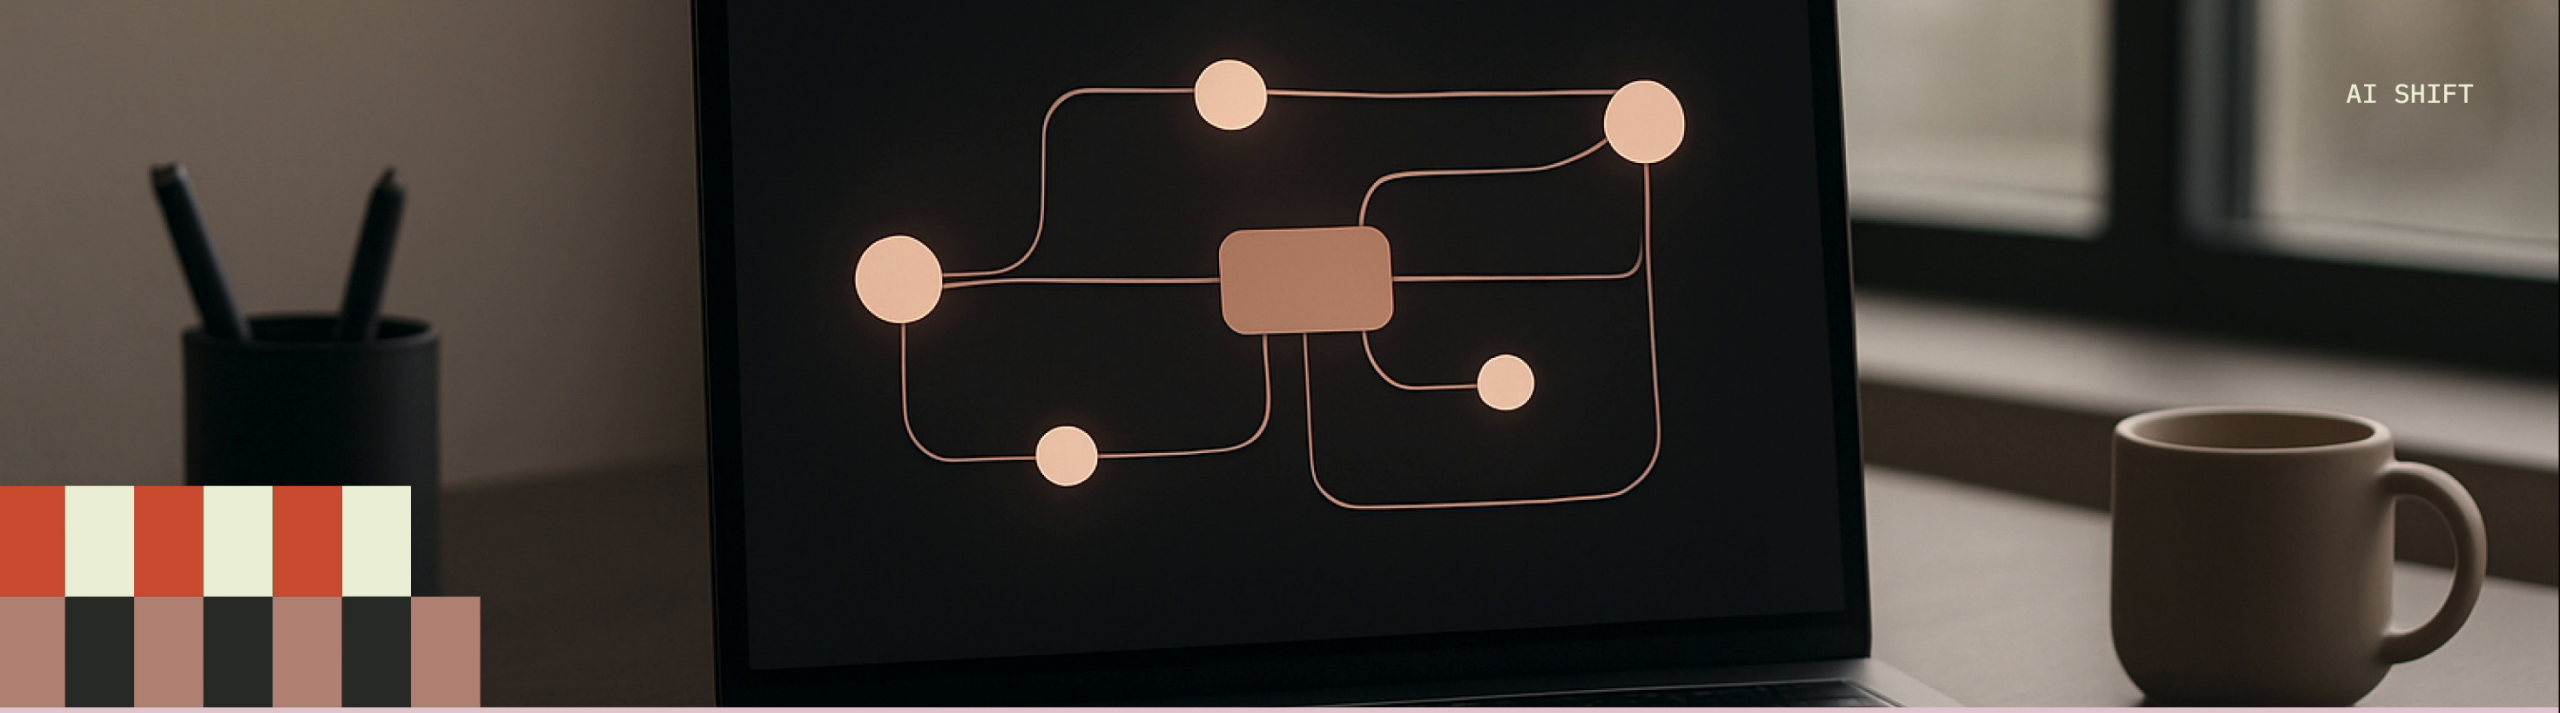

Built and managed an eight-person team during marketing operations.

AI

TRANSITION

Shifted focus to AI tools and automation workflows to scale efficiency.

The next shift: AI automation

AUTOMATION

As AI began changing how marketing and business workflows are created and delivered, I moved toward building with the technology rather than only using traditional service methods. Started creating tools and offering AI automation services.

What I learned from the service business

SIMPLICITY

Businesses need practical digital tools, not more technical complexity.

BARRIER

Many business owners want a website but do not know how to build or manage the technology.

VISIBILITY

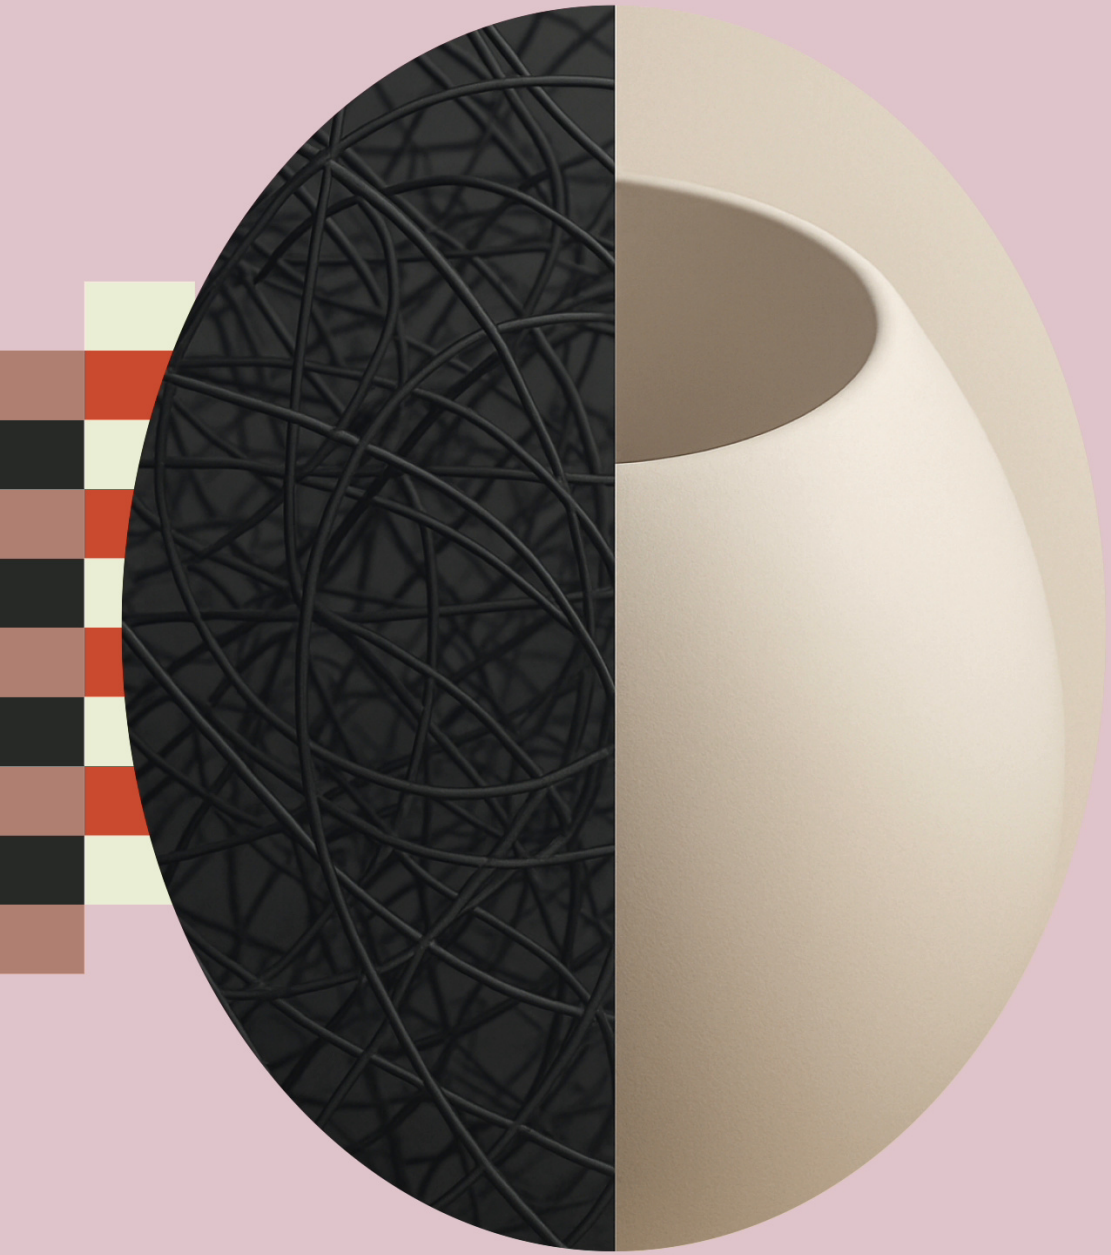

Working directly with clients gives me a clear view of real business needs.

ADOPTION

Overcoming adoption hurdles is key to bringing offline businesses online successfully.

ACTION

Turning daily client feedback directly into product requirements.

Why Lumen, why now

Businesses need a professional online presence, but technology and setup effort are barriers. Lumen makes website creation accessible without technical skills. Currently in development.

THESIS

Lumen product vision

CORE PLATFORM

Lumen is a website builder designed to help non-technical users create and manage a website more easily. Product is in active development with core workflows being refined.

Who Lumen is for

SMALL BUSINESS

Local businesses that need a professional website to attract customers.

PROFESSIONALS

Service providers and independent operators seeking an online presence.

STARTUPS

Early-stage entrepreneurs wanting quick web setup.

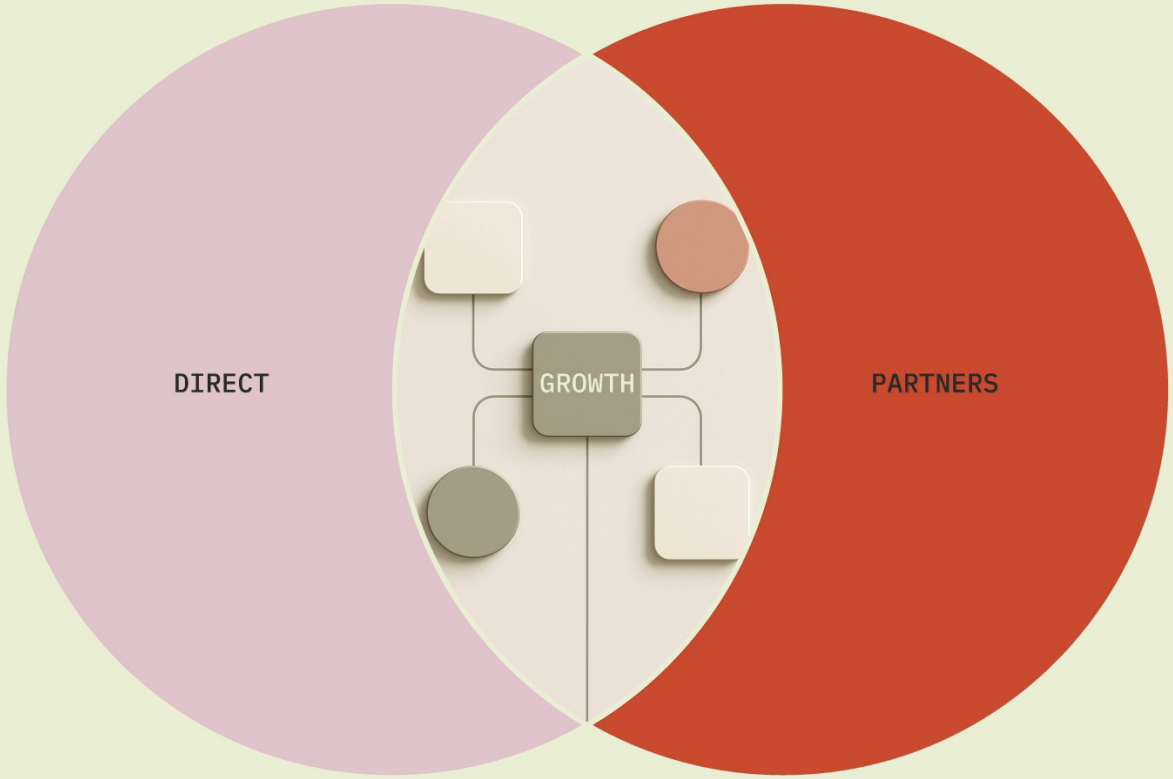

FREELANCERS

Digital service providers who can build and sell websites to clients.

VALIDATION

Segments are hypotheses to validate through customer interviews.

Distribution strategy

- Reach businesses that need websites but lack technical knowledge directly.
- Enable a freelancer and reseller channel so partners can earn by selling websites.
- Use influencer-led marketing to demonstrate outcomes and drive qualified interest.

Rebuilding the team

Built an 8-person team during the digital marketing phase. During the shift to AI automation, the operating team reduced to two members.

The plan is to grow deliberately as customers and revenue increase, supporting product and engineering capacity.

EXECUTION

Capital

01

Product

Improve reliability, usability, and the confirmed core website-building workflow.

02

Team

Hire essential product, engineering, growth, and customer support roles in stages.

03

Marketing

Run measurable influencer campaigns and customer acquisition experiments.

04

Distribution

Build freelancer and reseller channel enablement, onboarding, and partner support.

Validate target use cases, demonstrate the core product, run pilot projects, and prove a repeatable acquisition channel. Investment sought to scale execution.
